

About Par3.IT

Since 1993, *Par3.IT* has provided end-to-end technical solutions to businesses just like yours. Solutions that assure you that your business runs smoothly, accurately and securely. Solutions that reflect your business strategy and fit your budget.

Par3.IT is different from the competition because of our commitment to three core principles: *Technology*, *People*, and *Value*.

We want to be your *Technology* partner for all of your needs. We provide 100% solutions for your business. Whether it is hardware or software, voice or data, installation or consulting—just one phone call to *Par3.IT* is all it takes. And although we partner with some of the biggest names in the industry such as Microsoft and Dell, we remain vendor neutral to ensure that we provide the most flexible and cost effective solutions for your business.

We stand behind its technology with great *People*. We have one of the most experienced staff of technicians in the industry. Our technicians average 17 years of experience in computer services. In addition to this deep experience, our clients tell us that we are great listeners and easy to work with!

Finally, *Par3.IT* provides a great *Value* through competitive rates and a catalog of solutions that will fit any budget. We want to be your long-term technology partner, so we make sure each sale is a good solution for your business. Plus we provide service and support for everything we sell.

“We have worked closely on important technology initiatives with Par3.IT for years. They are reliable, good communicators and technically sound. Professional and a pleasure to work with!”

*Jim Z
